

Abstract

The aim of the bachelor thesis is to compile a modern critical edition of Municipal book of Pribyslav city from the years 1479-1503, including an introduction describing the wider context of city development, ironmongery development in the region and a short presentation of the history of selected ironmongery hammers. The edition is preceded by the analysis of the Municipal book from a diplomatic and paleographic point of view, listed are also the name and local index.
