ABSTRACT
This Bachelor Thesis deals with the issue of CAN syndrome. In the theoretical part there is a summary of CAN (Child Abuse and Neglect) syndrome. The thesis offers an analysis of the division, epidemiology, history, prevention and diagnostics of this issue. It also deals with family and school which are an important part of a child's life. In the practical part, the aim is to find out what is the awareness of primary school teachers of CAN syndrome. The information about teachers’ knowledge is derived from a questionnaire survey.
