

Abstract

The aim of this Bachelor Thesis is to design and create thematic atlas of the winery named Vinné sklepy Kutná Hora. In the theoretical part, there is carried out a research on the creation of cartographic outputs on a similar topic. Based on the research and concept defined by Voženilek and Kaňok (2011), which is focused on creation of maps and atlases, in ArcGIS and Inkscape software is made a draft of thematic atlas including map key. The result is a cartographic work that presents Kutná Hora winery and its vineyards on more than 30 pages.

Keywords: thematic atlas, cartography, Kutná Hora, winery, ArcGIS, Inkscape
