

Abstract

The thesis *The Picture of Polish and Poland in the Language Textbooks for Czech* reconstructs the image of Poland and Polish in the textbooks, grammar and other language books, which are addressed to Czech recipients. The thesis is divided into a theoretical and a practical part. The theoretical part consists of three main sections, which are based on the secondary literature, the first focuses on the the linguistic picture of the world, the second deals with the stereotypes and the prototypes and the third aims at the didactics of foreign languages in the Czech and Polish background. The purpose of the practical part is, based on an analysis of selected topics, to create a coherent picture of Polish and Poland. The topics include, for example, the roles of a man and woman in the Polish family, the characteristics of the Poles, spending time, cuisine and eating, names and surnames, description of historical events etc.
