

This bachelor thesis compares lexicographical processing of words in German-Russian online dictionaries. Its basis is formed by detailed analysis of selected sources. For the above studies were taken a few words of two parts of speech, namely: verbs *durchsuchen*, *umstellen* and nouns *Platz*, *Ort*, *Stelle*. Comparison carried out through the given information in dictionaries. Due to the synopsis it will be possible, to find disadvantages of entries, to assess the quality of equivalence and suggest possible improvements for the information proposal offers online dictionaries. Based on the above analyses and their results to each word will be compiled an revised dictionary entry.

Keywords: entry, dictionary, online dictionary, German, Russian, information proposal
