

Abstrakt

The Master's thesis deals with medieval and modern crypts on the territory of Czech, Moravia and Slovakia. The aim is to review the examined crypts, which have already been published. This Master's thesis is divided into three parts. In the first part, the overview of research and methodology work are summarized. Following parts are dedicated to evaluation of crypts on examined territory – to correct understanding of their meaning, architecture and funeral facility. The third part includes a processed catalog of archaeologically examined crypts.

Keywords

crypt, church, funeral, architecture, coffin
