ABSTRACT
I focused on the general view of the manor in my thesis. Chroustovice wasn’t an important manor. Due to this fact, it has never been written the work of a similar character. This thesis is personal to me because I have spent my life in Chroustovice. In the thesis I described historical, artistic, economical, social and ecclesial development of the manor. I described the changing of the owners of the manor. I tried to map trade with the surrounding villages and their belonging with the manor. I focused on the building of Chroustovice manorhouse, which was the centre of the manor, and it still dominates the village. I tried to collected the fate of the most prominent local natives. I tried to synthesize sources and literature. I enriched my thesis with rumors and stories that are still circulating in the region until today.
