

Abstract

Title: Analysis of sports career decathlon athlete Tomáš Dvořák

Objectives: The goal of the bachelor thesis is to analyze biographical materials and literature resources to capture and interpret sports career the triple world champion Tomáš Dvořák in years 1993 – 2008. Within the biographical study, there will be a punctual adumbration of whole of his sports career including his every success and every health issue.

Methods: This bachelor thesis is carried out as a review and I am going to use the method of comparison and analysis. The work is divided into two main parts. In first part I focused on theoretical part of decathlon itself, its creating history and psychomotor assumptions of successful athlete. In second part I closely analyzed the results of all races he took part in. I described them and used graphical schemes. I connected a short comment to each graphical scheme.

Results: In submitted bachelor thesis by studying obtainable materials I managed to map, evaluate and describe the multisport career of Tomáš Dvořák in years 1993 – 2008 including all his successes and health issues.

Keywords: sport, career, athletics, decathlon, world champion
