

REPORT OF BACHELOR THESIS

Leadership's name: Mgr. Kateřina Maršáková

Student's name: Abdullaziz Abdulmalik

Title of diploma thesis name:

Case Study of a Patient after Partial Hip Replacement

Goal of thesis:

The main goal of the therapy approach was to reduce the patient's pain, restore function of the hip and the lower extremity in general to its optimal condition to enable the patient to resume activities of daily living.

1. Volume:

* pages of text	84
* literature	30
* tables, graphs, appendices	6 figures, 6 appendices

2. Seriousness of topics:

	above average	average	under average
* theoretical knowledge		x	
* input data and their processing		x	
* used methods		x	

3. Criteria of thesis classification

	stupeň hodnocení			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfillment	x			
independence of student during process	x			
logical construction of work	x			
<i>There is just a short text about the physiotherapy after Partial Hip Replacement in the General part.</i>				
work with literature and citations	x			
adequacy of used methods	x			
<i>Detailed and careful examination and the chapter 3.7 (Evaluation of the effect).</i>				
layout of work (text, graphs, tables)	x			
<i>Nonstandard page numbering of Supplements. Conclusion is not on the separate page.</i>				
<i>The table name of the Table 19 and 20 is on previous page.</i>				
stylistic level	x			

4. Usefulness of the thesis outcomes: under-average average

5. Comments and questions to answer:

Which therapy procedure was the most effective and vice versa in your opinion?

6. Recommendation for defence: YES NO

7. Designed classificatory degree excellent

Date: 1. 5. 2019
