

Title: *Geographical modeling and data modeling*

Author: Jiří Roubínek

Department: *Mathematical Institute of Charles University*

Supervisor: *Mgr. Vilém Pechanec, Ph.D.*

Supervisor's e-mail address: *vilem.pechanec@upol.cz*

Abstract:

*This work deals with geographical modeling and data modeling. The first part of this work contains the theoretical background of geographical modeling and data modeling.*

*The second part of this work focuses on building data model for geodata. Data modeling is important part of development of software for geographical modeling and for geographical information systems.*

Keywords: *model, data, geography, GIS*
