Abstract

The diploma thesis summarizes professional theoretical findings describing the development and culture of organizations. This is the background for the theoretical framework, which focuses on presentation of the subject and on the tools used for diagnostics of an organization.

First, the thesis provides structured and clearly defined theoretical framework, which corresponds to a Diagnosis of Organizations taught at the Faculty of Humanities. The main goal of the thesis is to provide feedback on the theoretical and practical education of this subject. For purposes of the thesis, the method of deep interview was selected, followed by analysis and presentation of selected data. The interviews were performed with six respondents, graduates of the Faculty of Humanities - master’s degree program Management and Supervision in Social and Health Care Organizations. The final part of the thesis presents the results of the research.
