

## **Abstract**

This bachelor thesis deals with history of buildings constructed on the dominican lands in village Koloděje until year 1850. The aim of this thesis is, based on analysis of excerpted written sources and literature, to describe the origin and the development of buildings as well as to peek into the life of the local population and especially approach their strategy of paying off the tax and treadmill burdens. This thesis compares land taxes of houses on formerly rustic and dominican lands and also compares the tax burdens of houses on dominican lands in Koloděje and neighboring Běchovice.
