

Abstract

Name

Organization and structure of diving work within Police of the Czech Republic and Fire rescue service of the Czech Republic.

Objectives

The aim of this thesis is to process information about diving groups within the integrated rescue system, specifically about diving groups Police of the Czech Republic and Fire rescue service of the Czech Republic, to briefly summarize their history and describe the structure of their work and organization.

Methods

The method used in this thesis was the analysis of the relevant literature and Internet resources and their description and comparison. Furthermore, the method of uncontrolled interview with members of the units affected by the work was used. Individual interview took the form of a non-standardized interview, which had not been planned before and its course was dependent on the development of communication. Specifically, the interview was obviously informal, in which the respondent explained the purpose of the interview and then asked questions.

Result

Summary of diving activities of the Fire Rescue Service of the Czech Republic and the Police of the Czech Republic. Description of the work performed within the component and its organizational structure relative to diving work. Comparison of these works of both components.

Keywords

diver, diving unit, Police of the Czech Republic, Fire rescue service of the Czech Republic, integrated rescue system
