

## **Abstract**

The topic of my Diploma thesis is the integration of children from Orphanages to Elementary school. The theoretical part of this work is focused on the description of the Orphanage as an institution and the life in this institution from many aspects. As I think the most important part of the theoretical work are information which refer to the integration of children from the Orphanages to the classes of primary school and work of these kids within a primary school.

The practical part is taken in a qualitative way as an analysis of interviews with individual pupils from the Orphanages who attend the first and the second grade of the primary school which are aimed to the integration of these people to the collective in the primary school and on their subjective opinions. The work is finished with the synthesis of theoretical and practical work and the interpretation of results which have been found in the research. In the end there is also presented an overlap of topics which related to the discussed problematic.
