

Annotation

Bachelor's thesis is engaged in nurse's problems and their working conditions relating to new forms of education. It includes a view to the past and shows possibilities of education nowadays. It points out forms of qualities studying and lifelong education. The thesis refers to registration of nurses and changes of nurses' education in legislation of the Czech Republic. Nature of thesis forms an empiric past, which engages in research of chosen health officers, who reacted to nurses' education. Specimen of respondents made doctors and nurses from four health institutions: The Hospital in Motol , The Asociation of Samaritans in Kralupy nad Vltavou, The Hospital Hořovice and The Hospital Jablonec nad Nisou working at different branches. I also compared options of two professions, doctors and nurses to mentioned changes and progress in relationship nurse-doctor.
