Abstract: The aim of this bachelor’s thesis is to find out with questionnaire and compare the use of in-line skating in the summer preparation of the ice hockey team on different levels of performance and age.

Name of thesis: In-line skating and in-line hockey as training tool for summer training in ice hockey

Author: Jakub Šerf

Tutor: PaedDr. Ladislav Pokorný

Department: Department of physical education and sport

Aim of the thesis: Chart and compare the use of in-line skating in the summer preparation of ice hockey teams at different age and performance levels in the Czech Republic.

Methodology: Methods used in the thesis are questionnaire and comparison

Conclusion: Charting the use of in-line skating in the summer preparation of ice hockey players. Coaches do not often include in-line skating in summer training sessions. They use it more as a complementary activity in the form of in-line hockey than the training of special skills.

Key words: In-line skating, in-line hockey, training, summer training, ice hockey
