Title: The impact of myocardial infarction on the patient's lifestyles

Supervisor: doc. MUDr. Lenka Hodačová, Ph.D.

Number of pages: 93

Number of attachments: 2

Year of defense: 2020

Keywords: myocardial infarction, prevention, risk factors

The bachelor's thesis deals with the question of what effect the myocardial infarction had on the patient life style. This work is divided into two parts theoretical and empirical. In the theoretical part i describe the anatomy of the heart. The work also contains information about the myocardial infarction, its causes, clinical picture, diagnosis, treatment and complications. We also deal whit risk factor of myocardial infarction and their prevention.

The empirical part deals with the resulst of a questionnare survey of patient after myocardial infarction. The aim of my work is to find out whether myocardial infarction has affected the pationt's lifestyle and whether patients knos the risk factors of myocardial infarctiont they may affect themselves.
