

Abstract

Title

Characteristics of non-anthropogenic emergencies.

Objectives

The aim of this bachelor's work is to organize and characterise selected non-anthropogenic emergencies and summarise these events in a historical context.

Methods

The task of this bachelor's work is to seek out suitable literary sources, select important facts from them and process the issue of selected non-anthropogenic emergencies in the Czech Republic with an emphasis on the historical context of events.

Results

This work uses methods of comparing and compiling literature that relate to the characteristics of selected non-anthropogenic emergencies and descriptions of events that have happened in the past.

Key words

Emergency, non-anthropogenic, integrated rescue system, nature
