

Abstract:

In this master thesis I want to focus on high rank execs in the National Bank of Czechoslovakia. between years 1938-1953. These employers are important for me, because they were educated during the time of Austro-Hungarian empire or during the time of The First Czechoslovak Republic. They also had to work under nazi economic system and under communist economic system as well. These interactions between employers and both regimes are the ones that I would like to study in my master thesis.
