

Annotation

In my master thesis I consider the individual planning agenda within low-threshold clubs for children and young people. Within my thesis I focus on determination of the terms “individual planning” and “low-threshold club for children and young people” especially I am focused on “Nízkoprahový klub Husita” low-threshold club. The nature of my thesis is theoretical – researching and its main goal is to increase the quality of individual planning agenda in NPK Husita. The practical part of my work is focused on analysing individual plans made in 2019, pointing out the difference between them according to the age of the person making the plan, their topics, style and setting the targets of the plans according to the individual planning agenda.
