Case Study of Physiotherapy Treatment of a Patient after ACL Surgery

The goal of the bachelor thesis:  
The aim of the thesis is to provide all clinical findings that are written in two parts. The first is the theoretical part that brings the general outlook and information about diagnose of ACL Ruptured. Practical part describes the outcome and the effect of the applied physiotherapy.

**1. Volume:**

pages of text	75			
	37			
number of references	articles	monographs	electronic sources	other
	19	18	0	0
others	figures	tables	graphs	appendices
	2	32	0	0

**2. Seriousness of topics:**

	above average	average	under average	unsatisfactory
theoretical knowledge	X			
input data and their processing	X			
used methods	X			

**3. Criteria of thesis classification:**

	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	X			
<i>All aims have been done.</i>				
independence of student during process of thesis	X			
<i>Student worked independently during practise.</i>				
logical construction of work	X			
work with literature and citations	X			
adequacy of used methods	X			
<i>All used methods were chosen properly.</i>				
design of work (text, graphs, tables)	X			
<i>Text contains only few mistakes in whole thesis.</i>				
stylistic level	X			

4. Usefulness of the thesis outcomes: under average average

**5. Comments and questions to answer:**

Question: What kind of excersises are contraindicated four weeks after ACL surgery?

6. Recommendation for defence: NO YES

7. Designed classificatory degree Excellent

Date: in Prague 27.8.2020
