Akademický rok: 2019/2020

Karolína Gajdušková

Jméno a příjmení studenta:

1997 48041362
bakalářský Ekonomické teorie Ekonomie a finance 555558
Identifying driving factors of coffee prices Institut ekonomických studií (23-IES) angličtina čeština Petr Pleticha, M.Sc. PhDr. Lenka Šťastná, Ph.D.
08.09.2020 <b>Místo obhajoby:</b> Praha
The student started with presentation about global coffee price over the period 1965-2018. The student briefly commented on used time series analysis, ARDL method, diagnostics tests and test of cointegration and multicollinearity. She presented her final model, expected impacts and presented her own results for arabica and robusta coffee. Student concluded with summary of results and comments on the originally imposed research hypotheses and contribution of her results.  After the summary of both reports, the student answered satisfactorily both questions included in the opponent's review. Members of the committee posed several additional questions, not all of which were answered satisfactorily, namely, the question on the meaning of the F statistics in the ARDL model was not answered correctly which members of the committee understood as a signal that the student does have a good command of the method applied.
