

The content of this Diploma These is a brief description of Krkonoše with its characteristics, its origins and first colonizations, development of handicrafts, agriculture and other interesting things. There is a section devoted to walks through Krkonoše during different seasons of the year and also to childrens art painting. Another part of my Theses, that is devoted a lot of attention to, covers Photography - focusing on its benefits, and my feeling towards it. There are also maps of Krkonoše included in my Diploma Theses, as well as characteristics of cities well know for their importance (one CD is devoted to the city Vrchlabí), examples of the previously mentioned childrens paintings (altogether 168) and general photographs (altogether 898). Everything is saved on CD.
