

The Diploma Thesis „Chicane at Primary School" is in the theoretical part aimed at the basic information of the problem, the psychological cause for bullying, its protagonists, consequences of experience with bullying for victims, aggressors and witnesses. A separate part of this chapter is concerned with recommended strategies and methods to prevent from school chicagne.

The practical part is aimed at the investigation of the teachers' meanings of the chicane itself, their opinion on prevention and solving to bullying at school. Outgrowth of the diploma thesis is an information handout for teachers summarising basic "myths" and misperceptions about bullying and conveys relevant information with disproving arguments. The attachments are covered up by some completive information on forms of bullying along with characterization of examples, then there is an information handout for youth advising what to do in the case of being bullied, after it a view of stages in development of bullying in a group, questionnaires filed by teaches for empirical part and finally forenamed handout for teachers with "myths" about bullying.
