

Abstract:

Title of the work: Comparison of the selected indicators of team game performance in the highest men's basketball competition in the Czech Republic in the period 2000/01 to 2019/2020.

Objectives of the Thesis: The aim of the thesis is to compare, based on data acquired from official statistics the quantitative differences in the selected indicators of game performance for teams placed on second, sixth and tenth places in the highest men's basketball competition in the Czech Republic for 20 years after the regular season (from the year 2000/01 to the year 2019/2020).

Method of the work: Secondary analysis materials were acquired from the website of the Czech Basketball Federation.

Results of the Work: Have to show

- differences in the performance between seasons in each indicator of the same placed teams for a period of 20 years
- differences in the evenness of the performance in each indicator between the teams that placed second, sixth and tenth
- the summary of the average values in each indicator for a period of 20 years for the second, sixth and tenth, which we then compare

Key words: Basketball, team game performance, quantitative analysis, secondary analysis, comparison, difference, result.
