

Abstract (in English):

The aim of the diploma thesis is to map the form, development and direction of social work in the Central Military Hospital in Prague. In the theoretical part, the diploma thesis deals with the development of social work in the Central Military Hospital, as well as the role of the health and social worker, their competencies and their preconditions for the performance of social work in the hospital. The diploma thesis captures the methods of social work used in the Central Military Hospital in Prague and the scope of work of a health and social worker.

The practical part of the work finds out how the participating social workers perceive, experience and evaluate the possibilities and processes of social work in ÚVN. This part of the diploma thesis is a qualitative research, carried out by semi-structured interview with persons who are directly involved in the performance of social work, supplemented by case studies.
