

As used herein, the ear of humans are different things . For some it may najvysunutejšia be only that portion of the auditory system - pinna , for others it is a conversion part of the auditory apparatus - middle ear , and for another group of people is custom ear receptor component of the spirit of the inner - ear . To say nothing of other meanings words ear to ear containers and bags ; chick ear (she praslenitá - sage salvia verticillata , which so fiercely Zháňal witch Saxana ); Judas' ear -Another representative of Botany ; ear in terms of young squab .

The importance of this concept is expressed in many prísloviach , eg " wise ear ignores what hlúpych people " , " 's stupid how the ear from the carboy . "

The anatomical and physiological point of view is the ear institution for serving the perception sound , which is one of the five senses - smell , taste , hearing , sight and touch. For the sixth sense is reputed equilibrium nachádzajúci body is in the inner ear . pulses of these senses are processed and higher nerve ingredients together us inform about the world around us and in us.

Given that the auditory apparatus was evolved all the time along with vestibular authority , I decided to give even this and not to divide them . Let us therefore together go exploring and expand your horizons by ear - body zmyslovému , slúžiacemu the perception of sound and position. I believe that if, in this work we find nothing new , so at least osviežite to what you already know about.
