

Abstract

Thesis title: Comparison of differences in strategy and tactics of tennis double play between juvenils and adults categories.

Target of thesis: Observe and compare differences in strategy and tactics of co-work between tennis double play team-mates terms between juvenils and adults.

Method: There have been made play records on basis of indirect observation of 20 tennis contests of both categories. The records have been used for latter evaluation of differences between objective categories.

Results: This thesis is stressing different ways of co-work between tennis double players reflecting differences between juvenils and adults. There are not all ways of co-work being used in juvenils-category comparing adults, nor is activity between team-mates equal to one usual amongst adults.

Key words: tennis double play, situation in play, co-work between team-mates, active and inactive team-mate.
