University**

**Referee report on Master thesis submitted to the State
examination**

Student's Name: Amanda Maxwell
Supervisor's Name: Doc. Ing. Tomáš Cahlík, CSc.
Thesis Name: Implementing Renewable Energy in Developing
Countries: An Analysis of the Possibilities as Illustrated by Croatia and
Macedonia

Overall Evaluation:

The topic of the thesis is without any doubt very important. Issues of renewable sources of energy get in importance due to ecological damage and climate changes. The analysis of the potential of developing countries for exploitation of renewable energy sources requires a vast knowledge of political science, economics and facts. The present author has shown her ability to practice an interdisciplinary analysis. The thesis has a logical structure and ideas are clearly and very persuasively presented. Her knowledge of the relevant theoretical concepts and facts is very vast. The structure of the thesis is logical and arguments are persuasively stated. Her literature overview is impressive.

Due to above stated characteristics I propose to evaluate the thesis by grade A ("Excellent", "výborně").

SUMMARY OF POINTS AWARDED (for the explanation of categories and scale, please, see below):

CATEGORY	POINTS
Quality of Research	27
Clarity and Readability	10
Content/Quality of Ideas	40
Organization & Development	15
Manuscript Form	5
TOTAL POINTS	97
LETTER GRADE	A
