

## Assessment of Bachelor Thesis

**Student:** Vitaly Kaplunsky

**Supervisor:** Mgr.Jiřina Holubářov

The submitted final Bachelor Thesis by the student Vitaly Kaplunsky on the topic „Acute Cervical Pain“ comprises 65 pages of text with reference to 8 sources from literature. 6 from websites and 1 from lectures which he attended at the University.

The extensive theoretical part confirms that the student is well acquainted with the literature of this topic.

The special part is carefully elaborated including Initial and Final Kineziological examination, all the respective measurements and therapy.

I have some questions to the student:

Why is it that you were able to work with the patient for only 5 days, one hour a day during your 14 days of practice.

Conclusion : The Thesis fulfills all requirements fo a Bachelor Thesis and I therefore recommend it for defense.
