Number of attachments: 5

Year of defense: 2021

Keywords: general nurse, profession, prestige of the profession, social status, social role

This bachelor's thesis deals with prestige of the nursing profession in our society.

In the theoretical part I write about history of nursing and the role of the nurse in the past and in the present. Furthermore, I focus on what is a regulated profession, system of education in the Czech Republic, ethical and sociological aspects of nursing.

In the investigative part I present quantitative survey of opinions of public and nurses on prestige of the nursing profession in society. I have used online surveys and processed the results using graphs and statistical analysis. The results were compared with thesis of Slavěna Obrdlíková from 2008 on a similar topic „the social prestige of nurse in our community“.
