

# **Impact of Covid-19 pandemic on sexual services in Czech Republic from the point of view of employees of NGOs**

## **Abstract**

This bachelor thesis is focused on the effects of the Covid-19 pandemic on sexual services in the Czech Republic from the perspective of employees of non-profit organizations. The aim of this work is to determine the effects of the Covid-19 pandemic on sexual services, to point out the changes caused by the pandemic in the field of sexual services and watch the reactions of non-profit organizations. This is a qualitative research in which five employees of non-profit organizations participated. I obtained the data for my work through online interviews, which took place from March to June 2021. This work shows the changes in the Covid-19 pandemic in the field of sexual services. Discusses topics such as violence, marginalization, and intersectionality in relation to sexual services. In my work, the Covid-19 pandemic is worsening the living conditions of sex workers and often forcing them to lower their boundaries. It also turned out that the reaction of non-profit organizations was quick, and their help was necessary.
