

ABSTRACT

The aim of the bachelor's thesis is to find out the awareness of selected grammar and secondary school students about the issue of STDs. It was carried out by a standardized questionnaire, distributed among selected grammar and secondary school students. My bachelor's thesis contains theoretical part dealing with specific bacterial STDs. The individual chapters summarize especially the prevention of bacterial STDs, possible ways of infection, courses of the diseases, treatment, diagnostics and consequences of these diseases. In the practical part of the bachelor's dissertation, a survey was carried out at a chosen school, which concerns the recognition of symptoms of the diseases and general awareness of the topic bych smazala of the sexually transmitted diseases. I have come up with brief suggestios, which are mentioned in the text, based on the results of my survey.
