

**TITLE:**

Basic motor performance in students of one-branch study in their final year at the Faculty of Physical Education and Sport, Charles University in Prague and Faculty of Physical Education and Sport, Komensky University in Bratislava.

**AIM OF ASSESSMENT:**

The aim of the thesis is to compare the basic motor performance in students of one-branch study in their final year at the FPES, Charles University in Prague and FPES, Komensky University in Bratislava.

**METHOD:**

My final assessment has been compiled in form of empirical quantitative research. This research had been taking place under standard conditions with minimization of outer effects (in gymnasium).

One-branch students of the final year at FPES, Charles University in Prague and FPES, Komensky University in Bratislava are a selected sample.

**RESULTS:**

The results of our study show that the basic motor performance of the students at both Faculties in Prague and Bratislava is not significantly different from the statistical point of view.

**KEY WORDS:**

Motorics, basic motor performance, testing, UNIFITTEST 6-60
