

Hobbytry of pre-school child in the nursery school (in view of parent's suspension) it's very discussed today. Above all our society should engage in this problem a it should respect requirements, that call for children, if it's harmony with children's needs. The objective of my work is to find contemporary state and tendency of hobbytry's development out of the conception of education. The offer of the hobbytry is influenced by parents, because they decided about children's hobbytries. In empirical part I intent on parent's opinions and I value them.
