

ABSTRACT:

Thesis title: *Proposition and attestation of educational plan on secondary school.*

Thesis aim: We propose educational plan of volleyball for the lessons of physical education on secondary school without specializacjon. This work could be instumental as a direction during the thematic plan-making.

Method: As a method of research I used the observation, which was examined on pupils of secondary school of Ševětín. Pupils were evaluated at the end of the proposed educaton plan always during the play of 3:3 or 6:6. The educational plan was aplicated on pupils during three years, but purpose research and evaulation was made at the end of the last year after applicaton of all the proposioned lessons.

Results: I worked out the final results to three graphs , which evaluate the year itself and to a collective graph for all the years, where you can see all the successes and unsuccesses of each years together. Then was the evaluation implied by percents.

Key words: *Educational plans, teaching of volleyball, secondary school, pupils, preparations of lessons.*
