

Assessment of Bachelor Thesis

Student: Oystein Gronnevik

Supervisor :Mgr.Jiřina Holubářov

The submitted final Bachelor Thesis with the title „Osteoarthritis, Total knee replacement and its rehabilitation“ comprises 55 pages of text with reference to 12 sources from literature, and 7 from websites. The text is completed by 2 very nice pictures in the text and 14 in the Supplement.

The Thesis is composed of 2 main sections, general and special and their respective chapters.

Rehabilitation is divided into 9 Units. Every therapeutical Unit consists of 2 sessions, one in the morning and one in the afternoon. Every session included examination, therapy and results for which his work programe provided sufficient time.

It is clear from the therapy proposed in individual sessions that the student Is acquainted with a wide range of therapeutical procedures. He knew how to adapt these procedures to the actual state of the patient.

The thesis is excellently prepared and the diagnostical and therapeutical procedures used show that the student is capable of applying independently the knowledge gained during his study.

The Thesis fully responds to the requirements for the Bachelor Thesis. I recommend it for defense
