

Gothenburg, Sweden

31st May 2008

Credentials

Jana Szingertova has during 1st September - 20th December 2007 stayed at the lab of Assoc. Prof. Gunnar Tobin and has written the thesis "Proliferation in the Rat Urinary Bladder in Response to Experimentally-induced Cystitis" under my supervision. J. Szingertova has performed laboratory experiments including paraffin embedding of tissues, immunohistochemistry and microscopical examinations of tissue preparations. J. Szingertova has an excellent ability to collaborate with colleagues, is industrious and ambitious. During the thesis her skills at the lab and her ability in writing evolved rapidly. I will happily give J. Szingertova my very best of recommendations.
