

## Annotation

My bachelor assignment discusses a communication and its usage in medical environment. A part of verbal communication is placed in this assignment, although the aim of the assignment is nonverbal communication. A chapter about communication by acts, or a chapter which deals with specifics of communication with children can be found. The second part of the assignment is based on research examination focused on survey of nurses's knowledge degree in nonverbal communication area and the usage these informations in profession. Searched informations were controled by research examination between patients. The both patient's groups were from the bed ward (surgery, internal, children's ward) Regional Hospital Mladá Boleslav a.s..
