

Annotation

This bachelor's thesis outlines existing information on the topic of infertility, defines the terms "infertility", "assisted reproduction", "quality of life" and "psychological aspect of the disease" in context with the unpleasant mental, physical, social and economic factors, that partake in the quality of couple's lives. It also summarizes the legal policies of this problem in the Czech Republic.

The empirical part of this thesis was based on a survey, given mainly to clients of the center of reproduction Pronatal Arleta IVF in Kostelec nad Orlici. This survey focused on the problems of infertility and its impact on the quality of life of infertile couples.
