

Abstract

In the thesis on the role of special educator in the family of a child with a disability at an early age to deal with the issue of early care. Now through early care are special educator comes into direct contact with the family of a child with a disability at an early age and plays an essential role in the life of a family.

The work outlines the normal development of a child at an early age, I deal with family situations in which a child is born with a disability. I clarify the concept of early care and all of what this entails. Then monitors the situation in early care services in the region Kladno, primarily services the two main providers of early intervention in this region, Kolping Family Center Smečno and help vulnerable children Rosa Kladno.

The practical part is based on qualitative research methods in the form of an interview with mothers of children with disabilities using the services and facilities listed through dialogues with employees providing these services.

The aim of my work is to find out what the situation is in providing early care Kladno, what are its specifics, benefits, advantages, disadvantages.
