Keywords: nurses mistakes, nurses violence, motivation, nurse, burn out syndrom, relation of nurses to patient, prevent aquisition

Every of medical institutes are trying to offer the best care of their patients. All of hospitals want to aspire of accreditation and try to find every risks to prevent of patients damage. This problems including nurses mistakes also. In part of theory of my bachelor thesis I tried to explain problems bear on nurses mistakes. I wrote about causes of patients damage, why nurses having bad behaviour to their patients, which nurses take care about. I tried to propose to prevent aquisition againsts nursing violence of patients. Mistakes of nurses can't be forgot, but every mistakes could be a chance to be better in our work.

In part of research I choose research of quality and I used standardized interview. I spoke with six patients, who was lying in the hospital and I wrote everything, what they said to me. I asked them about problems of damage of patients by nurses. I asked of their experiences with this problem. Endly I asked them of prevent aquisition againsts nurses violence of patients.
