

ANGLICKÁ ANOTACE

Administration of the Prague Archdiocese in years 1913 – 2006 in the light of the catalogues of clergy

The history of administration of the Prague Archdiocese for the 20th century, especially for the period after year 1948 lacks its summary description. As the 20th century is a period of huge changes also in the relationship between the state and the church (or between the society and the church), there might be an interesting (and yet unanswered) question, if and how the church administration has reacted to the changes of the political, economical and demographical situation in this period.

Exposed study is based on the till now mostly omitted collection of sources for studying of the church administration's structure, i.e. collection of catalogues of clergy, which are conserved at the chancellery of the Prague archbishopric. The study describes the catalogues of clergy, brings basic information about the changes of the structure of the administration of the Prague Archdiocese and about the changes in the religious structure of its inhabitants, indicates some possible contexts between both topics and finally describes the initial steps of the renewal of parishes' process, initiated at the threshold of the 21st century.

Key terms:

Prague Archdiocese – catalogue of clergy – church administration – renewal of parishes' process – 20th century
