

Abstract

Diploma thesis „Progress in digitizing of television broadcasting in Czech and Slovak Republic at the example of ČT4 Sport and Trojka“ deals with contemporary status of analogue to digital broadcasting changeover. Its goal is to explore and compare this difficult process in two countries - Czech and Slovak Republic. For detailed results of this comparison there will also be analysis of two digital sport channels - ČT4 Sport and Trojka - in my diploma thesis. Both channels belong to public broadcasters. This diploma thesis intends to notice, describe and explain all differences found throughout the analysis.
