

## **ABSTRACT**

The diploma thesis is focused on finding the relationship of primary school pupils and secondary school students to the carnivores of the Czech Republic in the Lusatian Mountains and Ralsko Upland. Among the selected carnivores are brown bear (*Ursus arctos*), lynx (*Lynx lynx*) and wolf (*Canis lupus*). Fox (*Vulpes vulpes*) is used in the thesis for comparison. The thesis collects the opinions on these carnivores and compares them. The survey was realized by questionnaire survey. The thesis includes the characteristics of carnivores and their extensions.
