

REFERENCE OF BACHELOR THESIS OPPONENT

Study program: SPECIALIZATION IN HEALTH SERVICE - Bachelor degree

Study branch: PHYSIOTHERAPY

Opponent's name:

PhDr. Jitka Malá, Ph.D.

Author's name:

Alexandros Adamantiadis

Supervisor's name:

Mgr. Michaela Stupková

Title of diploma thesis:

Case study of physiotherapy treatment of a patients with hemorrhagic stroke.

The aim of the diploma thesis:

Present a case study of physiotherapy approach of a patient after hemorrhagic stroke.

1. Scope:

number of pages of the thesis / text	104/88			
number of used sources	34			
others	tables	fig./photos	graphs	supplements
	20	4	0	4

2. Formal and language level of thesis:

	excellent	very good	good	unsatisfactory
degree of fulfillment of the goal of the thesis			x	
work with literature, use of citation standard				x
work editing (text, graphs, pictures, tables)				x
stylistic level of the text			x	

3. Criteria for evaluating the special part of the work:

	degree of evaluation			
	excellent	very good	good	unsatisfactory
quality of the content and processing the theoretical part			x	
logical structure of work and balance of chapters			x	x
chosen examination techniques, design and their recording				x
adequacy, quality of therapeutic intervention and its recording		x	x	
ability to evaluate the intervention and interpretation of the results			x	x
level of work evaluation in relation to current knowledge				x

4. Usefulness of the results of the work in practice:

above average	average	below average
---------------	---------	---------------

5. Additional commentary and evaluation, questions for defense:

After studying a bachelor thesis of a student, I disagree with continuation to defence; the thesis is not done according to the basic rules of FTVS UK.

Opponent's notes:

- 1. The name of Charles University is without "in Prague".*
- 2. The thesis is not written according to formate recommendations - the text is written on both sides of the paper, some articles are not put in a block, and some pages don't have aligning sides. E.g. "table of content" is extended over the page line.*
- 3. A lot of articles are without citation resource information (e.g. page 9,10,11,12,13,18,19,20,21,23,24 and lot of other....)*
- 4. Most figures do not have a good citation norm.*
- 5. Can you show me the original Ethics Committee agreement? And Inform agreement? In the thesis, there are both documents in the appendix, but the Informed agreement is only a free blank form from the web pages of FTVS. There is no information about EC and an Inform agreement in the methodology.*
- 6. In the case report, there are some small and some big letters at the start of sentences. The format extension of tables is unacceptable (p. 36-40).*
- 7. There is no function testing of the patient; hereby, the patient is after stroke (2017).*
- 8. In conclusion, there is written that there was diagnosed with mild dysarthria, mild cognitive deficit and poor orientation in space. How did you examine this if there was no information about this in the examining protocol?*
- 9. In most cases of individual therapies, you have the therapy as " Same as the previous day". Are you sure that this methodology is correct?*
- 10. There is no function testing due to stroke impairment in the final examination.*
- 11. There is no adequate citation of figures (in Supplement 2)*
- 12. Ethics committee approval and Inform agreement should be as a supplement, not as alone chapters of the thesis.*

6. Statement of the supervisor:

I declare that after studying the whole work I found that in the work has not referenced sources properly.

7. Recommendation for defense:

yes	yes with reservations	no
-----	--------------------------	----

8. Proposed classification level:

.....

In Prague on: 9.5.2022
