

## **ABSTRACT**

This diploma thesis is focused on the didactic use of the TV programme *Hodina zpěvu* authored by Zdeněk Svěrák and Jaroslav Uhlíř. The first part of the thesis deals with the programme itself, a brief description of individual episodes and with its authors, whereas in the second part worksheets and other materials suitable for both face-to-face and distance learning are presented. The particular episodes of the programme are chosen based on the availability on the *Česká televize* website. The didactic materials focus on the development of vocal, instrumental, musical-motoric and listening activities.
