

Title: The result of changing rules on the content of performances in artistic gymnastics

Abstract: Graduation theses has been solving the problems which are connected with changing the rules of sports gymnastics for men and following reaction on content of competitive performance in the individual events of gymnastics combined event men. There are some questions as a result of work problematic: what's the sense of rules in sport ; did the change of the rules influence the content and structure of the performance ;how can I reach the result of solving the problems.

The object of graduation theses is the description and analysis of the content of competitive performance in gymnastics combined event during the final competitions on the European or World championship and Olympic games. I reached the mentioned object through chosen metods:

Study and description of competitive performances during the final competitions from chosen top competitions in sports gymnastics men, writing down the codes for further statistical processing and discovering the answers the mentioned scientific questions.

The result is comparison of the content of the rules in sports gymnastics men and analysis of the content of competitive performances. The conclusion includes the discusion about problems of the purpose and influence on the content of competitive performances through the change of rules in rhythmic gymnastics men.
