

Abstract

Project: Superior and efficiency sport of visually impaired people in the Czech Republic

Aim of the project:

The aim of the project is to compile an overview about Paralympic and selected sports that are done by visually impaired people here in the Czech Republic. The overview includes basic information about specification of individual sports of visually impaired persons as well as updated description of organization of sports for such disabled persons. Based on these facts it makes suggestions to improve the current state.

Method: To achieve the aim of this project, an author made an analysis of literature specialized in the given issue, compared the selected documents and personally joined several sport events aimed at visually impaired persons.

Results: The current state of organization and direction of the Czech Blind Sportsmen Association is not optimum. The suggestions to improve it are stated in discussion.

Key words: organization of sports, visually impaired persons, Paralympic sport, sport activities, superior sport, efficiency sport, handicap, vision impairment
