

ABSTRACT

The aim of the thesis is to map the compulsory lessons of children of younger school age in the Prague 5 – Barrandov area.

The theoretical part of the thesis introduces the importance of swimming, the history of swimming, the legislation of swimming schools, the swimming methods taught in basic compulsory swimming lesson and the teaching methods.

In the practical part, we will find the results of an investigation of the level of basic compulsory swimming lessons in selected swimming schools in the Prague 5 – Barrandov area. The investigation methods are the method of qualitative questioning – survey and the observation method. The resulting data are statistically processed and entered in tables and, for better clarity, in pie charts.
